BOULDER, COLORADO

Greetings again from the "Top of the World"

Once more we have acres of modern-day Iris growing vigorously in our fields and bursting with vitality—all available for your selection. Our mile-high climate and favorable soil conditions are "tailor-made" for growing outstandingly healthy rhizomes.

Glowing reports come in every season from customers pleased with the way "Top of the World" Iris perform in all sections of the country. Particularly gratifying are these good reports from sections where severe winter conditions demand the most hardy rhizomes.

If you have never grown any of today's modern Iris, a treat is in store for you. So much progress has been made in the past few years that today's Iris far surpasses its earlier ancestors in size, color, branching and growing habits.

We ship postage prepaid. Every item listed in this catalog is prepaid. Shipments start right after the Fourth of July, and continue through October. Iris do well when planted any time in this period. Some of our mid-western customers prefer to wait until September, thus avoiding the extremely hot, dry summer months. Unless specified otherwise, orders are shipped in same rotation as received. If you wish early shipment, please order as soon as possible.

We have no credit department, so must ask that remittance in full accompany each order. Remit by personal check, money order or postal note. Do not ask to have Iris sent C.O.D. Means red tape for us and greater cost for you.

Rhizomes are guaranteed to arrive in healthy condition and to be true to name. A culture leaflet with many helpful hints is included with each order.

ONE OF OUR MILE-HIGH IRIS FIELDS

Look over our collections. By grouping Iris we have in good supply we are able to offer outstanding values in our collections. There are selections to fit every purse. And don't overlook our money-saving group offers.

"Don't Delay; Send Today" for an assortment of these beautiful Iris. You'll be delighted!
